

Complete Façades Solutions

Omnis
By System'

Omnis By System', a leading provider of premium, architecturally inspired exterior solutions.

Comprising four divisions - Roofing & Cladding, Rainscreen Panels, Rainscreen Framing and Complete Façades - underpinned by our respected technical expertise, project management services, fabrication offering and export activities, Omnis By System' is your single source exterior solutions provider.

Throughout history, the built environment has taken on a myriad of shapes, styles and textures. Whether in response to emerging technologies, new approaches, anticipation of future trends or a respectful take on the past, architecture is a living reminder of how our urban environment has evolved and continues to evolve year on year.

Architecture today needs to deliver on so much, from meeting standards and environmental ratings to maximising value and achieving uniqueness. At Omnis By System', we understand this, and by combining our expertise and your project needs, we will deliver the results you expect.

Our vast history, impressive projects and high calibre customers are testament to our ability to deliver results time and time again. We offer technical expertise you can rely on, a partnership you can trust, the choices you want and the high quality systems your buildings demand; backed by our aftersales support and comprehensive warranties, you will experience total peace of mind.

By working with Omnis By System' you are choosing a partner who can offer complete solutions, and help you to create beautiful buildings that will stand the test of time.

10. Six reasons to work with Omnis By System'

12. Our people, your support

Combine glazing and panels to create a stunning, light-enhancing building

Eastland Homes, Manchester

With almost 400 multi-storey projects completed, you know that you are in good hands

The Shard, Leeds

It's not just about rails, panels and glazing - it's about designing and delivering the right integrated solution for each project.

Experienced

Having completed almost 400 multi-storey building projects with our trusted combination of curtain walling, glazing and cladding offering, you can be sure that your project will be in experienced hands.

Our façade systems comprise a lightweight aluminium framing system and a choice of glazing infills. To enable you to meet certain requirements relating to solar gain control, such as thermal comfort and aesthetics, we provide various options including glazing and a complete range of panel infills.

UK manufactured

We also manufacture a range of thermally broken glazing products. When coupled with our unique Capex Rainscreen Overcladding System, it offers an unrivalled solution to the refurbishment of multi-storey buildings. Tried and tested, this system has been used on high rise buildings for over 20 years.

Project management

Our highly experienced project team will work closely with you and other stakeholders throughout the lifecycle of the project to ensure maximum results are achieved.

Our team will take into consideration design requirements such as thermal expansion and contraction, building sway and movement, thermal efficiency and lighting -thus designing a system which is unique and fitting to your project goals.

Peace of mind

Our trusted and experienced project team's support, combined with full Professional Indemnity insurance cover for all works undertaken, will provide you and your client with peace of mind.

On-site support

Once designed, we work closely with one of our recognised contractors who complement the system with their professionalism and attention to detail.

On every project we appoint a Project Controller whose role is to ensure that all materials are scheduled and delivered timely in accordance with the agreed construction programme. All materials are supported with detailed guides about installation requirements and positions.

We continue to work closely with contractors to ensure we are aware of any site variations and to ensure that all elements of the systems are performing and functioning correctly.

Every complete façades project that we undertake will come with this support, no matter how small or large.

City West, Manchester

Eastland Homes, Manchester

Products exclusive to Omnis By System'

Support Systems

Rainscreen Panels

Omnis By System' offers a wide range of exclusive rainscreen panels including;

Petrarch®

Petrarch® cladding is high-quality, extremely durable, decorative and light weight, which can be used both internally and externally for new construction and to overclad existing finishes. Made from reconstituted stone, the panels are waterproof, maintenance free, highly resistant to impact and have a class O fire rating.

Bauclad®

High Pressure laminate panels are suitable for most building applications. A wide range of panel sizes means economy is achieved by optimisation. Ideally suited as a façade panel for rainscreen solutions, high performance and low maintenance.

Colorpan

For superior quality, aesthetics, performance and life-cycle costs look no further than Colorpan weatherboarding cladding. With over 51 colours and six wood grains, this exceptionally weather resistant cladding system offers a spectrum of creative opportunities to enhance and add vibrancy to any building.

Windows

Aluminium windows with a thermally broken polyester paint finish and dual colour options available. Types of openings on standard windows include tilt/turn, turn/tilt, casements and pivots. Double glazed units up to 42mm with a standard of 28mm. Our windows meet the relevant thermal requirements of Building Regulations.

Other products available:

- Terracotta
- Natural stones
- Metal products in various finishes

Commercial Road

The aluminium support system is lightweight, and non-corrosive - a maintenance free long life material.

Bespoke and project specific support systems are available as site assembly or pre fabricated formats for fast track projects.

This offers the benefit of integrating windows within the rainscreen cladding panels together with window reveals and pods.

Aluminium rails, stainless steel connections, resin anchors, fire barriers, insulation to current building regulations and parapet cappings all form an integral component within the design of the support system.

Kingsway

High performing complete façade solutions

Chalcots, London

Gypsy Corner

Maxwell Tower

Reasons to work with Omnis By System'

1

On budget, on time

Saving time and money throughout all the stages of a building life cycle is crucial, which is why we endeavour to value engineer our solutions to meet your specification and budget.

It's not just about the systems, it's about how we work with you which really makes the difference.

We understand this and make listening to you, a fundamental part of the way we work

By keeping your vision at the forefront of everything we do, we're able to constantly evolve, innovate and deliver the solutions you need. We are passionate about using our technical expertise to bring your creations to life. Coupled with our commitment to you, these two things are what drives our business forward. Whichever role your

business plays in the development of a building you can be assured that when working with us you will receive the right level of service which you would expect.

If you are partnering with us on an integrated project with multiple systems or placing a one-off order, we promise you that the systems, products and delivery will be of

the same high standard. Every project and order is different, which is why we create tailor-made solutions to suit each application. After assessing performance and aesthetic requirements, our highly experienced team will value engineer your system to meet your specific criteria.

Your trusted partner for complete exterior building solutions.

2

UK manufacturing

We are a manufacturer, not just a supplier, which means you will benefit from cost, design, delivery and manufacturing flexibility.

3

Choosing the right solution is easy

Our vast range of systems and products means that we provide an un-biased technical opinion on the best suited and most economical solution for your project needs. Whether it's an integrated project solution or a single product order, you can trust that your needs are paramount.

4

Market-leading technical support

Trusted and respected technical advice to ensure successful design and delivery throughout the lifecycle of your project.

5

Long-term performance

Our products and systems have all been through rigorous processes to ensure that they are fit for purpose and suitably certified. Some systems also come with our comprehensive workmanship warranty.

6

Reducing risk

Our products and systems are quick and easy to install, thus reducing installation time and minimising risk on site.

Our people, your support

Bold Street

You will be supported by a team of people who are dedicated to building and maintaining a prosperous relationship with you

Our aim is to listen to your needs, understand your specific requirements and work in partnership with you to deliver the best suited and most economic solution. We promise to be transparent and honest to help build a relationship where we can grow, learn and ultimately meet your aspirations.

Key contact

All projects and key accounts will be appointed a key contact. They will be your primary point of contact for all enquiries, issues and concerns which you may have.

From commercial to our accounts teams, we promise to be transparent and honest to help build a relationship where we can grow, learn and ultimately meet your aspirations

Trusted support

One of the valuable benefits of working with Omnis By System' is the support we can provide throughout an entire project. Our vast and varied experience can help maximise your project's value at all stages.

Project consultation

Every project is different, and by involving Omnis By System' at an early stage it can considerably benefit the development and realisation of your vision.

CPDs and training

Omnis By System' can deliver training CPD sessions to architects, contractors and fitters.
